SUMMARY

Junior QA/SQA Engineer with hands-on manual and exploratory testing experience, gained by building and testing a live, self-developed ML application. Strong in functional testing, test case design, and defect reporting, with working knowledge of API testing (Postman), SQL, and Playwright/TypeScript automation, built on ISTQB testing fundamentals.

SKILLS

Testing: ISTQB CTFL v4.0 fundamentals, manual testing, functional testing, exploratory testing, test case design (equivalence partitioning, boundary value analysis), defect lifecycle and bug reporting

Automation: Playwright, TypeScript

Tools: Postman (API testing), Git, SQL

PROJECTS

CyberSentinel AI — ML-based phishing, malicious URL, and malware detection platform (live, self-built)

- Designed and executed manual test cases across the URL, Email, and File modules using equivalence partitioning and boundary value analysis, tracking priority, type, and status for every case.
- Ran exploratory testing sessions (happy path, malformed input, error recovery) and logged defects through a formal defect lifecycle, including critical issues such as scan history exposing other users' scans (broken access control) and a Chrome extension showing a false "trusted sender."
- Built and trained a phishing-email classifier using TF-IDF feature extraction and Logistic Regression, achieving 98.73% accuracy (95% precision/recall/F1) on a 1,024-email test set.
- Designed and implemented a 10-feature rule-based URL risk-scoring engine (IP-as-domain detection, spoofing symbols, suspicious keywords, TLS/TLD checks) integrated with the AbuseIPDB threat-intelligence API for real-time reputation scoring.

QA Engineering Portfolio — github.com/mohaviaarif/qa-engineering-portfolio

- Maintaining a dated QA portfolio containing original test cases, bug reports, exploratory testing notes, a threat model, and testing documentation, developed through a structured 90-day practice program.

EDUCATION

Bachelor of Science, Computer Science — COMSATS University Islamabad, Abbottabad Campus

Graduated August 2026 | CGPA: 3.06
